

# LEVEL 1 - DETAILED DATA FLOW DIAGRAM

## 📌 Dashboard Features Explanation

- ✓ **P4 - User Dashboard:** Main interface showing user data, active plans, and navigation
- ✓ **P5 - Stripe Connect:** Handles connection to Stripe, processes "Connect" button click, and manages payment flow
- ✓ **P6 - Video/Media:** Manages video content display and active plan information shown to users
- ✓ **D4 - Media Storage:** Stores videos, images, and current active plan details
- ✓ **D5 - Stripe Data:** Stores Stripe connection status and available payment plans

✓ **Flow: Connect to Stripe:** User clicks "Connect" button  
→ P5 initiates Stripe API call → Response received →  
Payment processed → Saved to records

### **External Entity**

People or external systems that interact with our system (Admin, User, Stripe, Email Service)

### **Process**

Activities that transform or manipulate data (User Management, Authentication, Dashboard, etc.)

### **Data Store**

Databases or storage systems that hold persistent data (User DB, Payment Records, Media Storage)
